Profile

Results-driven Full-Stack Developer with a passion for continuous learning. Committed to team success and eager to embrace new challenges. Invested 6-7 hours daily for the last 3 years to expand skill set. Seeking opportunities to apply expertise, drive innovation, and contribute to cutting-edge projects.

Skills

Javascript	Javascript Libraries
React Js	Redux & Recoil
NextJs	Typescript	Firebase
MongoDB	HTML & CSS
GraphQL	NodeJs

Languages

English Arabic French

Education

Computer Science
Abou Beker Belkaid University of TLEMCEN

GPA of 16.24/20
High school of science

Over 100hr's of web development courses and data structures.

Professional Experience

Gym Membership Manager
- **Tech used:** ReactJs, MaterialUI, NodeJs.
- Provided a security system to manage clients

Key achievement:
- Accelerated long-running issues of security by 70%.
- Accelerated the client subscription by 50%.

Projects

Leetcode Clone

Tech used: ReactJs, Firebase V9, NextJs 13 with SSG, Tailwindcss.

Introducing Leetcode Clone, a LeetCode-inspired coding platform that helps you improve programming skills through algorithmic challenges, coding exercises, and an interactive environment. Sharpen your coding abilities, ace technical interviews, and master the art of problem-solving with my Leetcode Clone.

Portfolio

Tech used: ReactJs, CSS, React Libraries.

- Developed a simple well-designed website to show up my latest work.

Chat Room

Tech used: Django MVT design pattern.
- Users are able to create rooms, send messages, and have a unique profile.

Social Media Server

Tech used: NodeJs, ExpressJs, Melter, MongoDB, socket.io.

- The Server is reusable and it served my Facebook app clone.
- It supports real-time communication thanks to web sockets.
- Learned a lot of valuable information about web sockets and how to structure a powerful secure server.

♂ Interests

GYM | Reading software Books
