🪪 PROFILE

Hello there,

I'm Oussama, and I'm not your typical web developer. I'm an architect of digital experiences, a master of ReactJS, Next.js, and TypeScript, and a true believer in the transformative power of code.

While some may talk a big game, I let my work do the talking. I've woven my expertise into the very fabric of HTML, CSS, and JavaScript ES6 to create web solutions that don't just meet expectations but redefine them.

So, if you're searching for a web developer who doesn't just follow trends but sets them, I'm here to bring your vision to life. Let's craft something extraordinary together.

🧠 SKILLS

- ReactJS (core proficiency)
- React Ecosystem
- Next.js, TypeScript
- GraphQL, Node.js
- Firebase, MongoDB

- React Native
- JavaScript ES6, HTML, CSS
- REST API
- CMS -Sanity.io
- Javascript DOM

💼 PROFESSIONAL EXPERIENCE

Gym Membership Manager
December 2022 – June 2023

- Developed a comprehensive Gym Membership Manager web application using ReactJS, Node.js, Express.js, and Melter.js.
- Designed and implemented a user-friendly interface for gym staff to manage memberships and track attendance.
- Created automated notifications for membership expirations, renewals, and outstanding payments, improving communication and reducing manual follow-ups.
- Developed robust reporting features to generate insights on membership trends, revenue, and membership demographics.

Frontend Developer (REMOTE), E-commerce, Roslidosh
August 2023 – September 2023
Finland

- Led front-end development for an e-commerce vendor project, covering admin dashboard and website components.
- Collaborated with CEO, backend developer, and team to shape project decisions and features.
- Developed and maintained all website pages, proficient in ReactJS, TypeScript, and Ant Design.

- Utilized Figma for design coordination, ensuring seamless design-to-development integration.
- Built a responsive and user-friendly interface, enhancing the overall user experience.
- Contributed significantly to project functionality and aesthetics.
- Managed MySQL for data integrity and performance.
- Effective communication and teamwork skills in a diverse team.

Key Technologies:

- ReactJS | Ant Design | MySQL | Figma | TypeScript

📂 PROJECTS

CodePro

Description: Developed a LeetCode-like web application using ReactJS, Firebase v9, Next.js 13 with SSG (Static Site Generation), and Tailwind CSS. The project aimed to replicate the functionality of the popular coding interview preparation platform, allowing users to solve coding challenges, submit their solutions, and view explanations.

Tech used: ReactJs, Firebase V9, NextJs 13 with SSG, Tailwindcss.

Portfolio

Description: Developed a personal portfolio website to showcase my projects, skills, and experience as a Web Developer. The portfolio website serves as a central hub for potential employers or clients to learn more about my work and capabilities.

Tech used: ReactJs, Tailwindcss, Sanity.io.

Social Media Server

Description: Developed a Social Media Server using Node.js, Express.js, MongoDB, and Socket.io. The project aimed to provide a scalable and real-time social media platform with features such as user authentication, post creation, comment functionality, and real-time notifications.

Tech used: NodeJs, ExpressJs, Melter, MongoDB, socket.io.

Code Compiler Web Application

Description: Developed a versatile web application that allows users to compile and run code in various programming languages. The Code Compiler web app provides a seamless and user-friendly interface for developers to write, compile, and test code in multiple programming languages, all within a single platform.

Tech used: React.js, Typescript, Tailwindcss, npm

Gym Membership Manager Desktop Application

Description: Developed a robust Gym Membership Manager desktop application using Electron.js, catering to the specific needs of gym owners and staff. This application offers a comprehensive solution for managing gym memberships, payments, attendance tracking, and reporting, all within a user-friendly and efficient desktop environment.

Tech used: React.js, MaterialUI, Node.js, Melter.js, Electron.js

Achievements:

- Successfully built and deployed the Gym Membership Manager desktop application using Electron.js, resulting in an efficient and feature-rich solution for gym management.
- Received positive feedback from gym owners and staff for the application's user-friendly interface, seamless payment integration, and powerful reporting capabilities.

Big Projects and Websites

Full-stack Apps:

- Developed a series of clone apps like **Reddit**, **LinkedIn**, **Facebook**, **Clubhouse**, **Tesla**, **Destiny**, and **Medium**, showcasing proficiency in ReactJS, TypeScript, SCSS, Firebase, SanityCMS, Redux, Recoil, MUI, and Next.js.

- Built RESTful API websites with ReactJS and Firebase, leveraging the power of real-time data synchronization and authentication to deliver dynamic and interactive user experiences.

Fitness App:

- Created a fitness app that utilizes GraphQL and Next.js to provide a comprehensive collection of exercises. Users can explore different exercise categories, and view detailed descriptions and instructions. This project demonstrated expertise in GraphQL integration, server-side rendering, and front-end development using Next.js.

COVID-19 Tracker:

Developed a COVID-19 tracker app with visually aesthetic graphs and charts using MaterialUI. The app presents up-to-date COVID-19 statistics user-friendly and informative.

Landing Websites:

Created responsive web pages for newBank and Manage Blogr, delivering visually appealing and accessible experiences across devices. Leveraged HTML5, CSS, JavaScript, and Tailwind CSS to build intuitive and engaging landing websites.

🌐 LANGUAGES

English | Arabic | French

🎓 EDUCATION

Computer Science, Abou Beker Belkaid University of TLEMCEN

GPA of 16.24/20, High school of science

Over 100hr's of web development courses and data structures.
